

# RANGEHOOD FILTER SELECTOR

CHOOSE THE RIGHT FILTER FOR YOUR  
RANGEHOOD BY USING THIS GUIDE

## MAKE YOUR COOKING EXPERIENCE COMFORTABLE

Keep the air in your home clean, and make your cooking experience comfortable by cleaning and replacing your rangehood filters. This is essential to ensure your rangehood functions as expected

### BEST WAY TO CLEAN YOUR RANGEHOOD MESH FILTERS:

1. First remove the filter/s out from the hood, by using the tab to pull.
2. You can then hand wash your filters or place them in your dishwasher on a hot cycle for added convenience. To hand wash - submerge and soak your filters in a sink with warm soapy dishwashing liquid or baking soda, for about 10 minutes. Then scrub the filters using a brush or scourer until clean. Avoid using harsh chemicals when cleaning your filters as they can tarnish the mesh.
3. Leave your filters out to dry (before refitting your filters, make sure they are completely dry).
4. Place the filters back into the hood sockets.

### TO REPLACE YOUR RANGEHOOD MESH OR CARBON FILTERS:

1. Simply remove and discard the old filters. To remove the filter/s out from the hood, use the tab and pull.
2. Fit your new filters into the sockets. You can also purchase our universal Unilux range of filters [here](#). Be sure to use this guide to see what filters fit your rangehood.

KEEP THE AIR IN YOUR HOME CLEAN, CLEAN AND REPLACE YOUR RANGEHOOD FILTERS REGULARLY. MESH FILTERS SHOULD BE REPLACED EVERY 1-2 YEARS, AND CARBON FILTERS EVERY 3-4 MONTHS
