Welcome to the AEG fabric care collection. Integrated into every washer and dryer you’ll find intelligent technology and responsive design, guaranteeing you exceptional performance time after time. You’ll discover that one touch redefines what’s possible at home.

We innovate so that you can elevate what you do to new heights every day.
Imagine putting your precious sweater in the washer. Imagine trusting a silk dress to a dryer. We've not only imagined it, we've done it. Washed the black dress time after time. Dried a soft wool sweater over and over. Every time they emerge without shrinking or fading, still vibrant and soft, because AEG has redefined washing and drying. Protectors of fabric. Defenders of colour. Guardians of fibres.

Unprecedented care for the life of your clothes.

IMAGINE THAT.
WE ARE PIONEERS WITH A VISION

We thrive upon innovation designed to give you the ultimate feeling of mastery in your kitchen. We see your needs of today and foresee the ones of tomorrow so that you can achieve results that don’t just meet, but exceed your standards.

We believe in intelligent technology and exceptional performance, helping you to take anything you do at home to the next level, every day.

We are proud of our distinctive engineering and responsive design, guaranteeing you the performance you expect and deserve.

We are a brand that people turn to for intelligent and exciting new ways to guarantee their outcome.

This has been our passion for over 130 years, and continues to be our passion today.

We are AEG.

And together with you, we are always an idea ahead.
Tomorrow’s inspiration is here

The way we eat will change. The way we dress will change. The way we live will change. We know how technology can enhance the world around us. It has even lit up an entire continent. More than 125 years ago, AEG introduced the light bulb from America to Europe. Connected to our grid, electricity spread across the continent, transforming lives.

That’s why we make sure our appliances not only exceed your needs today, but also embrace tomorrow’s technology to fit your future requirements.

Hans Strohmeier
AEG designer

...using the language of design to make technically advanced appliances easy, intuitive and a sheer pleasure to use.

Built in 1909, the AEG turbine factory in Berlin is an influential example of industrial architecture. Its revolutionary design features 100m long and 15m tall glass and steel walls on either side. It was a bold move and world first that would have a durable impact on architecture as a whole.

EXTEND THE LIFE OF YOUR WARDROBE FAVOURITES

Top Tips
- It is always best to follow the instructions on the fabric care label, but in some cases these may be outdated.

To help you care for your clothes, we've highlighted below our up-to-date advice:

Don't overwash
90% of the clothes we wash aren't dirty enough to be thrown in the laundry basket.

Lower temperatures
Temperature labels represent the maximum washing temperature, not the recommended temperature. A lower temperature will give greater protection on the environment, but on the colours and fibres of your clothes too.

Avoid dry cleaning
This chemical heavy process can be hard on your clothes and the environment.

Do tumble dry
No shrinking guaranteed with AbsoluteCare™ Tumble Dryers, even when drying wool.

Silk wash program
The specialised silk program keeps the silk aloft in the cradle movement of the drum and does not twist the very delicate fibres of silk.

ProSteam® Technology
The steam reduces creases and folds. It is also perfect for refreshing clothes as it absorbs odours.

AEG - The Fabric Care Collection
IT’S THE LITTLE BLACK DRESS GUARDIAN

Imagine a washing machine that you can trust to keep your colours vibrant and blacks as bold as the day you bought them. At last, there is no need to compromise performance for care. Because for the first time ever, AEG SoftWater technology removes the minerals from water that can be harsh on fabrics. Maintaining the colour, shape and feel of every garment. Wash after wash. It’s more than a washing machine. It’s the guardian of your clothes.

**AEG SoftWater**
- Purifies and softens water using a filter for gentler wash on fabrics.

**ÖKOMix Technology**
- Unique pre-mixing of detergent, softener and water to reach every fibre.

**ÖKOPower Program**
- Superior cleaning results at 30°C in less than an hour.

IT’S THE DELICATE WOOL GUARDIAN

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare™ System have tailored programming to control precisely the movement and temperature of the drying drum. Holding delicate fibres aloft so silks keep their shape and wrinkles are reduced. AbsoluteCare™ System: redefining tumble drying for every fabric in your wardrobe. You can also use the new Outdoor Program to restore water protection of outdoor garments better than air drying. This intelligent program adapts the rotation used for treating hand-wash woolens so there’s no shrinkage.

**AbsoluteCare™ System**
- Intelligent drum movements and temperature adjustments for ultimate care of your clothes.

**SensiDry® Technology**
- Gentle and energy efficient drying at lower temperatures.

**ÖKOMix Technology**
- Unique pre-mixing of detergent, softener and water to reach every fibre.

**ProSense™ Technology**
- Protects fabric from over drying by optimising time and energy consumption to suit individual loads.
INTRODUCING THE WOOL SWEATER DEFENDER

Now you can tumble dry everything you wash. From the softest wool sweater to an everyday business shirt or ski jacket. Dryers with the AbsoluteCare® System have tailored programming to precisely control the movement and temperature of the drying cycle. Preventing shrinkage. Maintaining shape. Restoring waterproofing. Redefining tumble drying for every fabric in your wardrobe.

- **AbsoluteCare™ System**: Intelligent drum movements and temperature adjustments for ultimate care of your clothes.
- **SensiDry® Technology**: Gentle and energy efficient drying at lower temperatures.
- **ProSense™ Technology**: Protects fabric from over drying by optimising time and energy consumption to suit individual loads.

INTRODUCING THE DELICATE SHIRT DEFENDER

Faultless fabric never goes out of style. Your delicate pieces need to be treated gently to ensure that their quality is timeless, no matter how often you wear them. To achieve this, ASG 8000 series washing machines with advanced ÖKOMix Technology blend detergents and then softeners with water before they enter the drum. In other washing machines, less than half of the fibres are reached by softeners. ÖKOMix Technology guarantees that, for the first time ever, every fibre is cleaned and cared for, even with shorter cycles. Every thread, every stitch, every fibre. Expertly protected.

- **ÖKOMix Technology**: Unique pre-mixing of detergent, softener and water to reach every fibre.
- **ÖKOPower Program**: Superior cleaning results at 30°C in less than an hour.
- **ProSense™ Technology**: Intelligent sensors optimise wash times to care for your clothes.
Quality clothes are made to be worn, but everyday pieces need care to maintain their condition. In AEG 6000 series washing machines, every load is measured to tailor each cycle and calculate just the right amount of water and energy the wash requires. Whether you wash one shirt or a full load, the washer will adjust accordingly, reducing wear and tear by taking the minimum amount of time necessary for a thorough clean. And reducing water, energy consumption and washing time for smaller loads. AEG washing machines keep clothes looking their best. Every wear, every wash.

ProSense™ Technology
Intelligent sensors optimise wash times to care for your clothes

Steam Refresh
Quickly refresh your garments without the need for washing

ÖKOInverter Motor
The ÖKOInverter motor works without brushes, extending the working life of the motor whilst using less energy.

Clothes that are exposed to too much heat and motion simply will not last. ProSense™ Technology in AEG tumble dryers uses temperature and humidity sensors to fine-tune the drying cycle every time, ensuring clothes are never over-dried. Whether you dry one shirt or a full load, the dryer will adjust accordingly to take the minimum time necessary. Reducing wear and tear. Protecting fabrics. Saving energy and time. Your everyday pieces are dried efficiently, monitored constantly and cared for cycle after cycle.

ProSense™ Technology
Protects fabrics from over drying by optimising time and energy consumption to suit individual loads.

ProTex Soft Drum
Special design to improve airflow and reduce tangling and creases

Full Reversible Door
Simplified handling with the option of four different handle positions.
Imagine a washing machine that you can trust to keep your colours as vibrant and black as possible, whilst never compromising on cleaning performance.

A machine that washes deeply and thoroughly every single time. Finally, there is no need to compromise on performance or care with AEG. It’s time to care more for the clothes that mean something to us. Our washing machines keep clothes feeling like new. Even those one-of-a-kind pieces that are more than just fabric. We provide incredible gentleness and superb washing results using the least energy. Choose an AEG washing machine that can refresh tired clothes between washes with steam. Or one that optimises the performance of your detergent. You can even safely wash your woolens in all of them. It’s more than just a washing machine; it’s the guardian of your clothes.

WASHING MACHINES
EVERY FIBRE CLEANED AND PROTECTED

ÖKOMIX

Whilst conventional washing machines need high temperatures to activate detergent and clean properly, AEG’s ÖKOMix premixes the detergent in a separate chamber to activate all the enzymes before spraying on to your garments. So detergents can work at their best even in lower temperatures, to ensure the colour, shape and feel of each of your garments is maintained, wash after wash.

ÖKOPower program
Our 9000 and 8000 series washing machines, with fast-acting ÖKOMix Technology, come with a new ÖKOPower washing program. It takes just 59 minutes and produces outstanding cleaning results with minimal energy consumed during the cycle.

Silk wash program
The specialised silk program keeps the silks aloft in the cradle movement of the drum and uses reverse action in a very gentle and efficient way to reduce wrinkles.

Woolmark Green
AEG gives consumers the confidence to put woolen garments into a machine, which has been lacking for the last 30-40 years.

Peter Ackroyd, The Woolmark Company
CARING FOR CLOTHES, SAVING WATER AND ENERGY

ProSense™ technology’s intelligent sensors optimise and display the estimated wash time within 30 seconds of starting the wash cycle. Whether it is a few shirts or your entire weekly laundry, the wash time, water and energy consumption adjust to ensure they are only washed for the exact amount of time required. This ensures that fabrics suffer less wear and tear, maintaining colour and texture.

With ProSense™ Technology you get:

- Faster load detection – quickly adapts the cycle after the program starts.
- Higher accuracy – optimises the cycle based on the textile type by detecting the load size and measuring the water absorption.
- Greater flexibility – adapts the cycle for even the smallest loads (0.2 kg).

ProSense™ An optimised wash cycle results in less over-washing and less wear and tear.

Quickly refresh your garments without the need for washing.

Similar to professional machines, the ÖKOInverter motor works without brushes, extending the working life of the motor whilst using less energy.

Complete a wash cycle with steam to reduce wrinkles, saving time and reduce the need for ironing.

Reduces your washing time up to 50% on certain programs for smaller loads, saving you energy and time.

Automatically shuts off the water inlet if a leak is detected in the hose.
Your favourite pieces need to be treated gently to ensure their quality remains timeless no matter how often you wear them. ÖKOMix technology in the 9000 series washing machine guarantees that every fibre is cleaned and cared for.

Never dared to tumble dry wool, silk or outdoor garments before? Now you can tumble dry everything you wash. From the softest wool sweater to the business shirt you wear every day. Dryers with the AbsoluteCare™ System have tailored programming to precisely control the movement and temperature of the drying drum ensuring every fabric gets the right movement and temperature to dry it completely whilst preserving its quality look and feel.

Woollens are kept flat against the drum to replicate flat drying. Outdoor garments are given just the right amount of heat to maintain functionality of their waterproof membrane. Silks are held aloft in the cradle movement of the drum to protect from damage. Every fabric gets the right drum action and temperature to dry it completely whilst preserving their quality look and feel.

The Woolmark Blue certification in drying will treat wash items in the gentlest possible manner ensuring you can safely dry all of your woolen garments.

SENSIDRY HEAT PUMP
SensiDry Technology is gentle and energy efficient through lower drying temperatures.

PROTEX SOFT DRUM
Reverse tumbling action ensures better tumbling and airflow to result in even drying and less creasing.

OKOFLOW SINGLE FILTER
Single filter that is easy to reach and clean, maintaining drying effectiveness and energy efficiency of your dryer.

8 ENERGY STAR RATING
SensiDry heat pump technology delivers the benefits of perfect drying at a much lower running cost.

REVERSIBLE DOOR
Customise to your needs with four different handle positions.

The Woolmark Blue certification in drying will treat wash items in the gentlest possible manner ensuring you can safely dry all of your woolen garments.
DARE TO DRY EVEN YOUR HAND WASH ONLY ITEMS

Trust AEG with our AbsoluteCare™ System, where intuitive and intelligent technology have been carefully designed to dry even your most delicate hand wash only garments. The fast drum speed motion ensures woolen garments lay flat on the inside of the drum walls to replicate flat drying.

There are no damaging movements in the drying cycle to shrink or felt delicate garments. Designed for your outdoor garments, the outdoor cycle restores water protection, thanks to careful temperature control. An exact temperature is applied for a specific amount of time to maintain functionality of the garment. Meanwhile, the specialised silk program keeps the silks aloft in the cradle movement of the drum running at a low speed and uses reverse action in a very gentle and efficient way to reduce wrinkles.

DARE TO DRY GARMENTS YOU NEVER THOUGHT YOU COULD WITH 9000 SERIES TUMBLE DRYERS – EVEN YOUR SOFTEST WOOLLEN SWEATER. OUR WOOLMARK ACCREDITED TUMBLE DRYERS COME WITH OUR UNIQUE ABSOLUTE CARE™ SYSTEM, A TAILORED PROGRAM THAT PRECISELY CONTROLS THE MOVEMENT AND TEMPERATURE OF THE DRYING DRUM. CARE MORE FOR YOUR FAVOURITE CLOTHES.

- Depth is measured to front corner of the unit, not centre of the cutout front surface.
Warranty
Electrolux Home Products warrants that for domestic applications, the AEG appliances featured in this brochure are free from defects in materials and workmanship for 5 years. All warranties are subject to the conditions set out in the warranty card accompanying the product when purchased.

Perfection is nothing without endurance. Every AEG product in our collection is equipped with our assurance that it will perform beyond expectations. It’s called AEG – Garantie. You will receive a 5 year warranty with every product. Of course, it’s nothing less than you’d expect of high performing German standards. We Garantie it.

Product information
The descriptors and illustrations in this publication apply to the specific products and models described as at the date of issue. Under our policy of continuous product development, product specifications may change without notice. Prospective purchasers should therefore check with their retailer to ensure this publication correctly describes the products that are being offered for sale.

All information supplied is to be used for general reference purposes only and is on the understanding that Electrolux Home Products Pty Ltd will not be liable for any loss, liability or damage of whatever kind arising as a result of reliance on such information. Colours of products illustrated are as close as printing limitations allow.

Electrolux will at all times comply with its obligations pursuant to law including the Australian Consumer Law. This warranty is in addition to the other rights and warranties you may have under the Australian Consumer Law (ACL) and Electrolux will at all times comply with its obligations at law including the ACL.
AEG. We are part of the Electrolux Family.
